

Account

Original definition from `account`

```
model odoo.addons.account.models.account_account.AccountAccount (env: Environment,
ids: tuple[IdType, ...], prefetch_ids: Reversible[IdType]) [source]
```

```
_name = account.account
```

```
name : str
```

Required:**Name:**

Account Name

```
currency_id : int
```

Name:

Account Currency

Comodel:

res.currency

Possible_values:[odoo/addons/base/data/res_currency_data.xml](#)

Forces all journal items in this account to have a specific currency (i.e. bank journals). If no currency is set, entries can use any currency.

```
code : str
```

Name:

Code

Store:

this field is there only for technical reasons

```
account_type : str
```

Required:**Name:**

Type

Selection:

```
equity_unaffected : Current Year Earnings  income : Income  income_other : Other Income
expense : Expenses  expense_other : Other Expenses  expense_depreciation : Depreciation
expense_direct_cost : Cost of Revenue  off_balance : Off-Balance Sheet
```

Account Type is used for information purpose, to generate country-specific legal reports, and set the rules to close a fiscal year and generate opening entries.

reconcile : *bool* [↗](#)

Name:

Allow Reconciliation

Check this box if this account allows invoices & payments matching of journal items.

note : *str* [↗](#)

Name:

Internal Notes

tax_ids : *Sequence*[*odoo.orm.commands.Command*]

Name:

Default Taxes
